

Liberty Mesh

Design: Niels Diffrient

A Revolution in Mesh Seating

Liberty Mesh, with Form-Sensing Mesh Technology, is unlike any other mesh chair. With its tri-panel construction, Liberty Mesh has the body-fitting contours that single-panel stretch mesh chairs simply can't achieve. It also offers perfect lumbar support for everyone, without the need for external devices or manual adjustments.

Designed by Niels Diffrient.
Niels Diffrient's designs are grounded on the philosophy of form flowing from function. His work has spanned generations, consistently looking at past trends to reinvent the tools we use for daily living. Diffrient channels his knowledge of engineering, architecture and human factors into the creation of highly functional and aesthetically timeless designs.

Features and Innovations

Self-adjusting recline

- Intelligent counter-balance recline mechanism automatically provides the right amount of support through the full range of recline motion, regardless of the user size and weight
- No tension springs to adjust
- No recline locks to set/release
- During recline the angle between torso and legs opens up for better body function
- User maintains near constant eye level during recline

Pivoting backrest

- Extra motion of the backrest during recline automatically adjusts to the changing needs of the spine
- Provides additional lumbar support as needed

Form-Sensing Mesh back

- Tri panel, low-stretch mesh construction creates body fitting contours and self adjusting lumbar support for a customised fit
- No external lumbar devices to adjust, break or lose
- Low-abrasion mesh protects clothing
- Modular for easy replacement

Contoured seat

- Cushion of generous proportion enhancing comfort levels
- Carefully sculpted to match body contours
- Increased contact area reduces pressure points
- Removable seat for easy replacement

Standard cylinder

- Provides a generous seat height range in accordance with Australian Standards

Castors

- 8 cm dual-surface castors roll easily on carpeted floors and quietly on hard floors

Frame and base

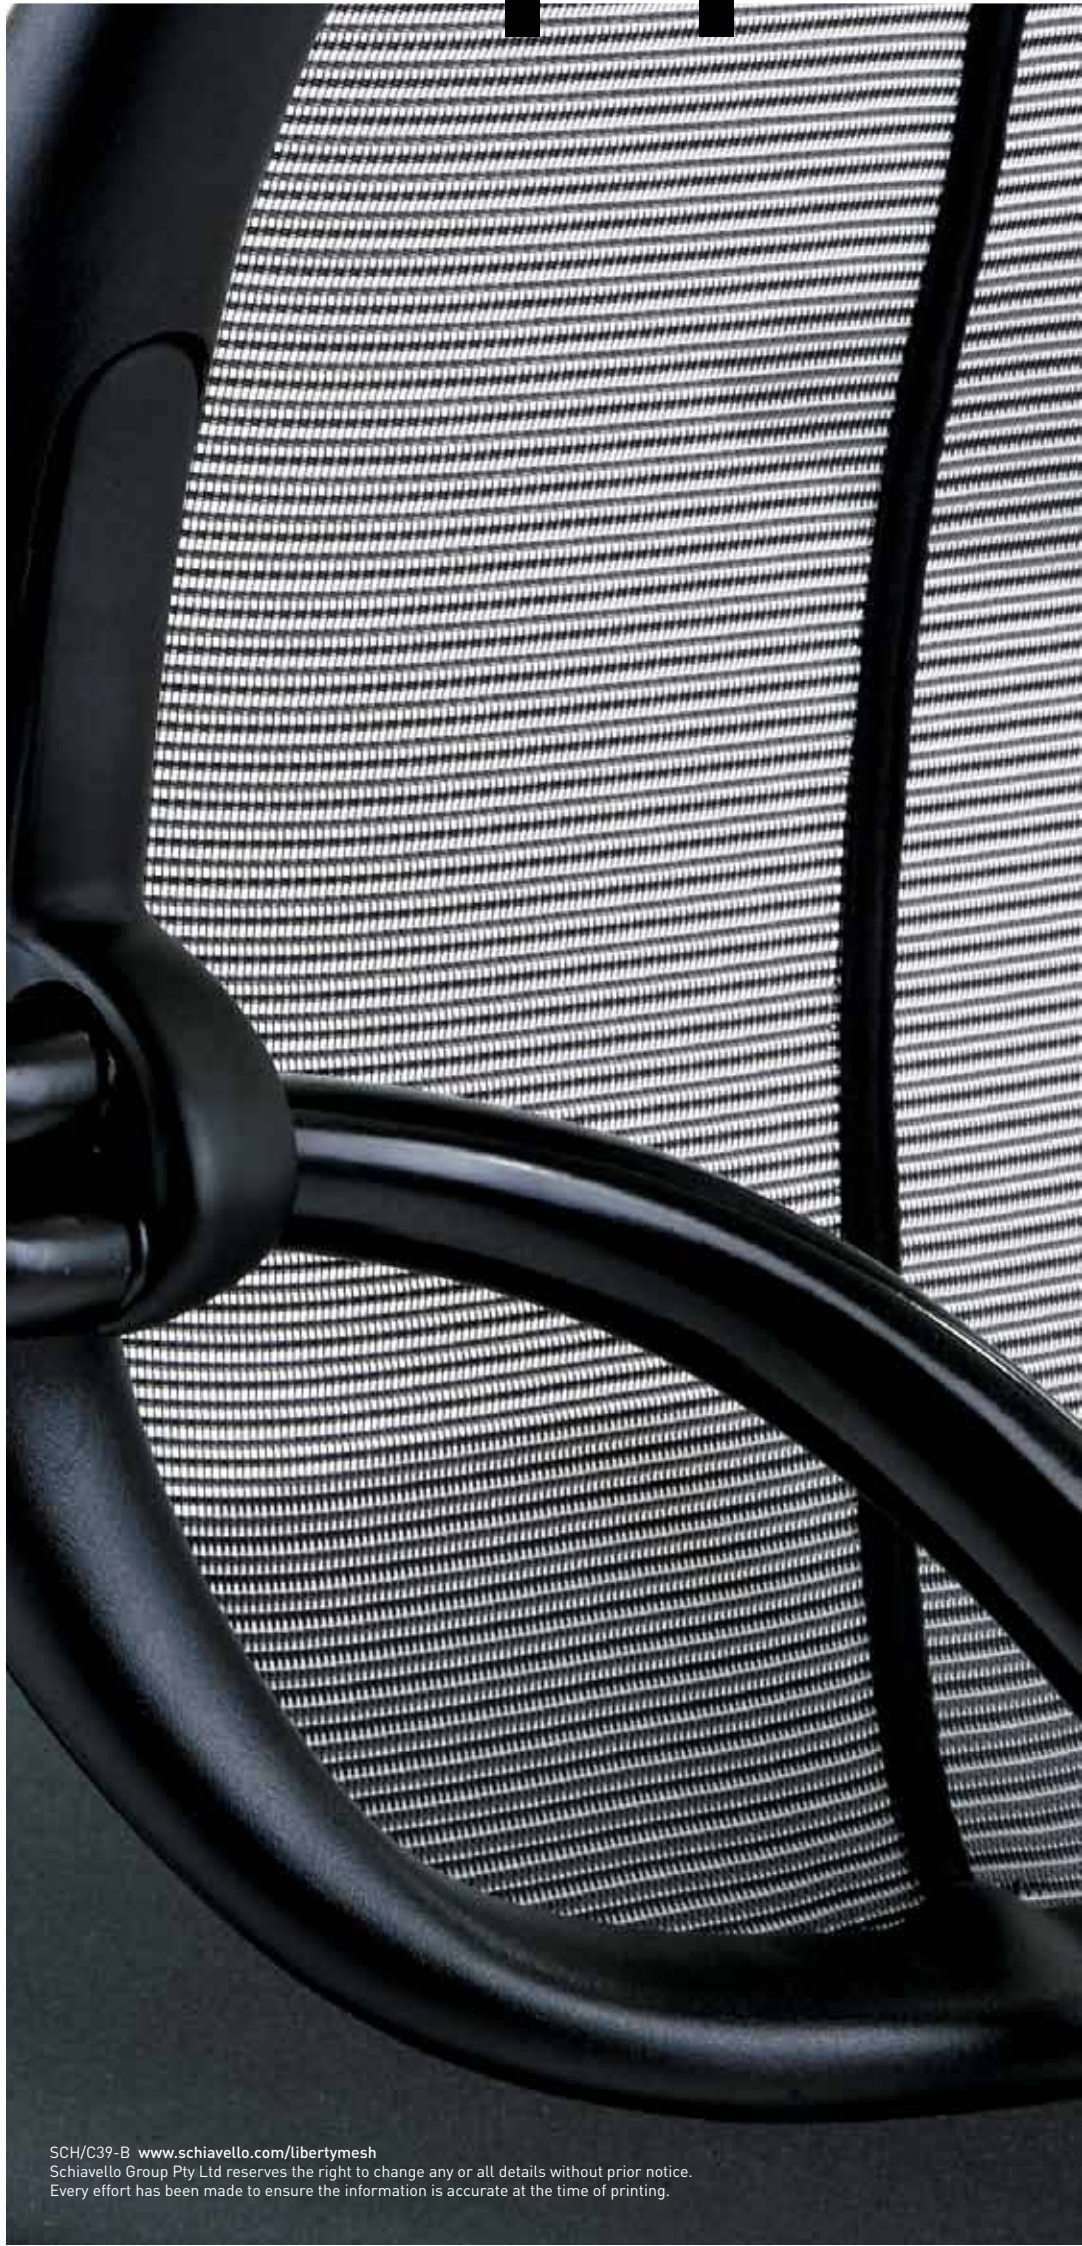

- Available in black or polished aluminium; with or without arms - fixed or adjustable

Liberty Mesh and the Environment

Liberty Mesh was designed to have minimal impact on our environment. It is lighter in weight and made from significantly fewer parts than chairs in its class, which means that less material and fewer manufacturing processes are used in its creation. More than 50 percent of the material in Liberty Mesh is recycled and about 95 percent is recyclable.
