Millem System

Millem has been designed to accommodate a 102mm wide single and double glazed system, integrating into conventional 64mm metal stud and plaster wall partitions. The system is robust, extending comfortably to 3.6m in height. Featuring a highly sought-after slim line glazing detail, Millem will accept single, double and off set glazing up to 12mm thick.

Strength in Design

Responding to today's modern workspace, Millem supports a slim-line profile yet still retains maximum rigidity. Reinforced extrusions minimise the need for additional mullions, providing stronger structures that prevent flexing, often the source of annoying rattles and creeks especially around door jambs.
