Designed by Korban/Flaubert

## Tom Stool

Sit, Stand, Stack, Store

Tom has been designed by Korban/Flaubert for Schiavello to provide a playful stool with a wide variety of applications.

Tom's design consists of a simple, pure, invertible form, where cone meets cylinder. Tom lends a sense of fun and individuality to the home, office, cafe, retail outlet, and playground.

Tom is the result of a series of model experiments merging cones and cylinders to suit its many purposes. 'We like to investigate elementary geometries for furniture and objects; providing simple solutions for a complicated world,' explains Stephanie Flaubert.

Tom can be flipped over to reveal a different profile and purpose. Use it as a side table, foot stool or for additional seating. Made of indestructible polyethylene, Tom's composition enables indoor and outdoor use.

**Dimensions:** 460h x 395dia / 300dia

**Material:** Rotomoulded polyethylene, UV stabilised.
