

# INTERSTAT 90

**schiaavello**

The versatility of Interstat 90 is endless. The system is fully stackable, demountable, reconfiguration is simple and cost-efficient. Flexibility applies to your choice of desking system also.

### Interstat 90 Workstation

The Interstat 90 panel system has evolved in response to dynamic changes in workplace technologies and work practices. While continuing to represent excellent quality and value, this system now offers additional benefits that make it more versatile than ever.

Compatibility with our desking systems is a major feature. Where worktop height adjustment is required, simply combine selected panels with our freestanding desking system as shown above

You can raise or lower the entire work surface in seconds, simply by electric mechanism. Alternatively, you can attach our fixed-height worktops to your choice of panels (right). Enhancements to the Interstat 90 system are numerous.

Panels are now delivered pre-finished and can be quickly clipped together on site. Our simplified capping system allows panels to be added or exchanged without fuss. New lay-in cable ducts make it easier to install and manage softwiring.

At the top of each panel is a discrete channel which can carry a variety of accessories from our range. As well, a channel below the cable duct contains a pocket for tidy storage of excess wiring. All these refinements reflect our philosophy of continual product improvement.

The dimensions of the panels are unchanged, so you can add new Interstat 90 components to your existing workstation - minimising waste while keeping the lid on your facilities management budget.

### Interstat 90 Office

When installed as a full-height panel system, Interstat 90 offers several advantages. The modularity of the panels provides a visual link between the enclosed offices and workstations in the general office area.

Both solid and glazed panels are available and ducted panels can be included, simplifying cable reticulation. Any of our full range of standard accessories can be attached to the solid panels. To complete the picture, compatible doors are available.

The versatility of Interstat 90 is another feature. As the system is fully demountable, reconfiguration is simple and cost-efficient. Flexibility applies to your choice of desking system too. All Schiavello desking systems complement and integrate with the Interstat 90 System.

# Specifications

## Typical panels

Solid panel

Solid panel with power duct at 800mm (approx)

Solid panel to 800mm (approx) with glazed panel above (single or double 6mm glass)

Solid panel to 800mm (approx.) with power duct and glazed panel above (single or double 6mm glass) Optional excess cable pockets shown

## Typical doors

Solid door

Fully glazed door with crash rail

The versatility of the Interstat 90 system is evident from the range of panel types and sizes available. There are solid, glazed and ducted panels, which can be installed in any combination. Panels are delivered pre-finished, ready to be quickly clipped together on site. The dimensions shown here are indicative only, as panels and doors can be manufactured to your exact specifications

## Typical panel dimensions

Schiavello's concepts and products are developed in Australia by applying a design process that brings together the company's core design principles and engineering with the creativity of local and international designers.

The Schiavello head office and world-class manufacturing facilities are integral to our continually developing rich tapestry of knowledge. This knowledge ultimately assists us in informing the right solutions and tools for each organisation's needs and people, allowing us to consistently achieve our philosophy that 'Anything is possible'.
