# Kase storage system

## introduction

### Product overview\_modules

Kase is a modular, flexible storage system offering limitless storage possibilities coupled with a timeless aesthetic. Its freestanding modules are engineered for instant reconfiguration, accommodating retrofitted elements and accessories, enabling the Kase system to effortlessly evolve with changing needs.

Designed by IMO.

Schiavello is manufacturing the Kase storage system under license.

### Key features

**Design\_** Sleek and unobtrusive design achieved through minimalist form.

**Durable\_** Made from 0.95 mm zinc seal steel with a powder coat finish, making it impervious to wear and tear.

**Diverse\_** Kase is a credenza, workbench, file system or library, accessible from both sides. The infinite versatility of Kase makes it ideal for workspaces and displays in public spaces.

**Functional\_** Kase facilitates dynamic spatial arrangements to create individual or group storage areas. Twin drawer, file drawer and cupboard units are accessible from either side in open plan applications.

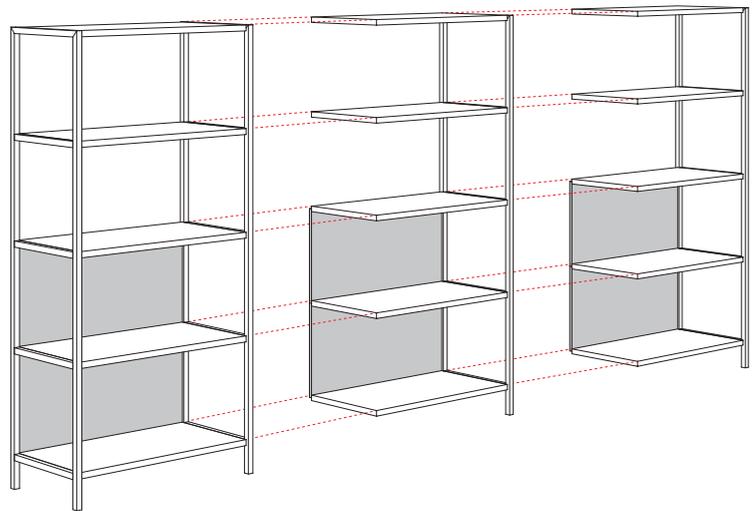

### MODULE OPTIONS

There are two standard widths and four standard heights as set out below. The shaded areas show the minimum number of back panels required for strength and stability for each height. Additional back panels may be added to enclose a face if required. These can be positioned on either the front or back of the unit making it accessible from either side. All modules are 400 mm deep.

Overall widths

3 connected modules type K80 = 2356 mm

3 connected modules type K100 = 2956 mm

Initial module

Add-on module

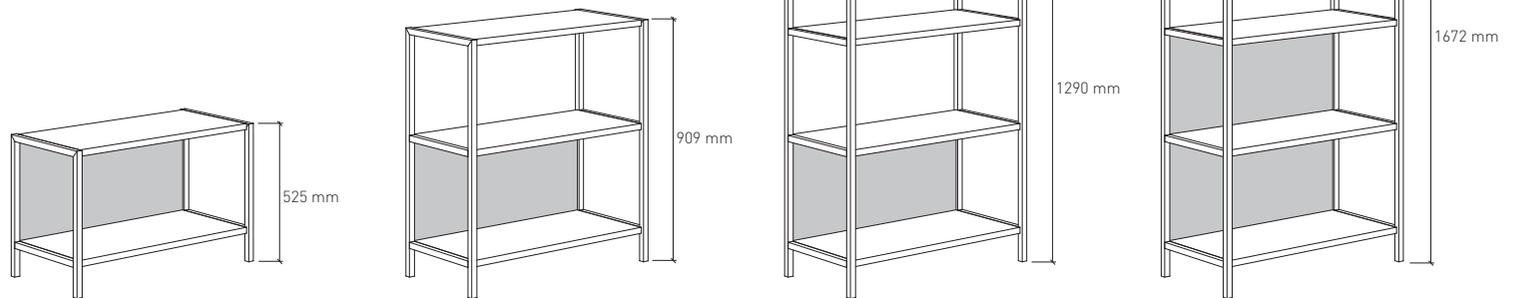

Add-on module

### MODULE RANGE\_DIMENSIONS

Add on modules are 22 mm less in width than initial modules, (one frame thickness). Each module has fixed shelves at 360 mm centres. This allows for storage of A4 and foolscap standard binders and folders.

#### STANDARD WIDTHS

type	initial module	add-on module
K80	800 mm wide	778 mm wide
K100	1000 mm wide	978 mm wide

# Kase storage system

## introduction

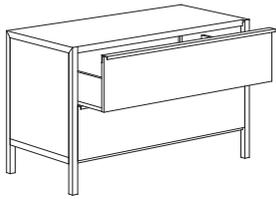

### Product overview\_accessories

The selection of shelves, drawers and cupboards illustrated, offer limitless storage possibilities. Cupboards and drawers can be positioned to face either the front or back of the modules to form single or double sided units. Back panels and infills are easily repositioned to work as screens or create openings.

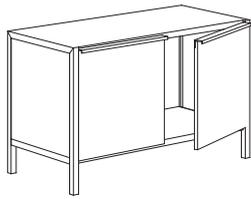

### ACCESSORIES OPTIONS

Side infill panels are used to enclose shelving bays but must be specified separately when required. When cupboard and drawer units are ordered, the appropriate number side infill panels to enclose the units specified are included. When additional back panels are required to that illustrated on the standard modules, they are not included and must be specified separately.

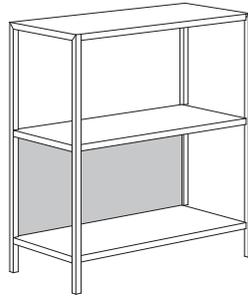

Example: A KCD 909 mm high 2 door cupboard attached to a K2 or K3 high module. These modules as illustrated come standard with one back panel. To enclose the cupboard requires two. One additional back panel must be specified.

code KFD

### ADDING ACCESSORIES

File drawers should be positioned below K2 height and twin drawers below K3 height. Drawers should only be opened one at a time. Wall fixing brackets can be provided if drawers need to be positioned above those heights or several opened at the one time. Drawers operate on 30 kg load capacity extension runners. Shelves carry a 50 kg maximum load.

## Axis | One Plane

### workstations combination examples

Kase Axis modules combine with One Plane desking to create flexible, space efficient workstation configurations. To enable single and double sided layouts, each individual module in a spine run, (initial and add-on) can be faced either way providing internal access to one, or both sides of the spine. A selection of storage options is available plus integrated soft wired cable reticulation with service outlets.

All modules, accessories and desks are movable within the spine and the whole system can be disassembled and reconfigured as requirements change. Back panels and side infills are added to enclose and divide sections in the same manner as those illustrated in the Kase shelving and storage section.

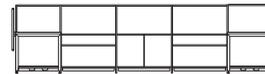

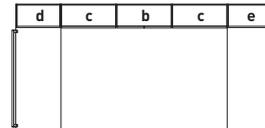

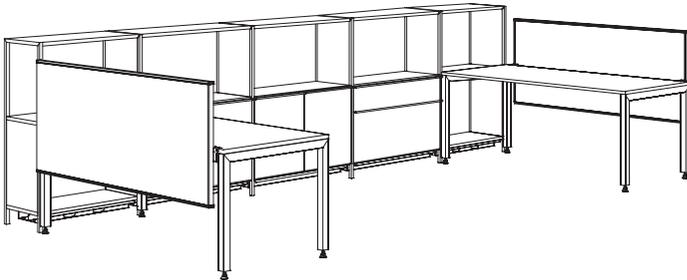

Double sided 4 workstation cluster with a 1500 mm x 800 mm One Plane desk and a Kase KA8 hinged door storage unit to each position.

## Options

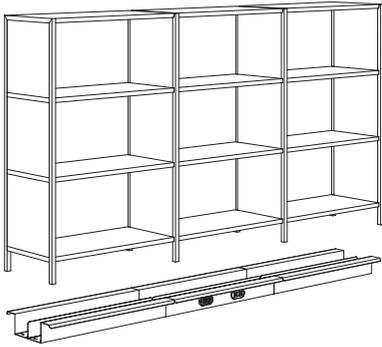

cable reticulation | function walls | accessory trays | plant boxes

### Cable reticulation

Segregated metal cable trays with outlet module cut-outs attach below bottom shelf.

#### INTERPOWER SOFTWIRING SYSTEM

Schiavello Interpower softwiring system delivers power and lighting to workstations. The system is easily connected, disconnected or relocated without the need to isolate power and with minimal inconvenience. All connections within Interpower systems are protected by a positive lock mechanism to prevent accidental power disconnection.

There are numerous outlet combinations available for each option. Refer to Schiavello Interpower brochure SCH/W05-C for complete product information and technical specifications.

### PLANT BOXES AND SEAT CUSHIONS

The versatility of the Kase Storage system provides opportunity to create attractive, functional task specific structures.

Planter drip trays are to capture small amounts of excess water from pot(s), not designed to hold large volumes of water.

## Product specifications

general | cable reticulation | flexibility | construction materials\_modules |  
construction materials\_accessories | powder coating finish | warranty

---

### General

Kase is a modular, flexible storage system offering limitless possibilities. Its freestanding modules are engineered for instant reconfiguration accommodating retrofitted elements and accessories. It is a credenza, workbench, file system or library. Shelves and back panels are easily repositioned to work as screens or to create openings. Accessories such as cupboards, drawers, shelves and movable book ends enable tailored layout solutions.

Kase is designed by IMO  
Schiavello is manufacturing the Kase Storage system under license.

### Cable reticulation

The system includes optional clip-on segregated cable reticulation trays and a selection of service outlet modules and soft wiring connections. Also included are integrated components that provide efficient means of routing services cabling to the cable trays from the ceiling, walls or floor. ie. power blades, umbilicals and power poles. The softwiring electrical system is Schiavello Interpower certified to Australian Standard AS/NZ 3131.

### Flexibility

The system is easily demounted, relocated, extended or reduced in size and all components are reusable. Kase easily dismantles and flat packs for transport.

### Construction materials\_modules

Side frame\_22 mm mild steel square tube  
Shelving and back panels\_1 mm zinc seal  
Height adjustable leveling feet\_zinc cast

### Construction materials\_accessories

Shelving and back panels\_1 mm zinc seal finished powder coat.  
Cupboard doors, drawer fronts and infill panels\_18 mm MDF finished powder coated or timber veneered. Drawers operate on steel ball bearing extension runners.

---

### Powdercoating finish

All aluminium is powder coated to Australian Standard AS 3715-2002. Colour as specified. All metal components are powder coated to Australian Standard AS4506 2005. Colour as specified. Available finishes include selected laminates, timber veneers and powder coated MDF in a range of colours.

### Warranty

The manufacturer warrants the system for a period of not less than 5 years against faulty materials and workmanship and guarantees the supply of parts and service of all standard components for a period of not less than 10 years from date of installation.
