# A single platform to meet all your workplace needs

Nura Space is a Workplace Management Software platform designed to easily understand and optimise workspaces of the future, allowing employers and their teams to curate a workplace experience centred on wellbeing, safety and efficiency.

More than ever before, our industry understands the value of data and making data-informed decisions for their people and business. With Nura Space's smart phone app and web dashboard, this flexible digital platform will

help organisations to understand how spaces are used by managing workplace utilisation and behaviours.

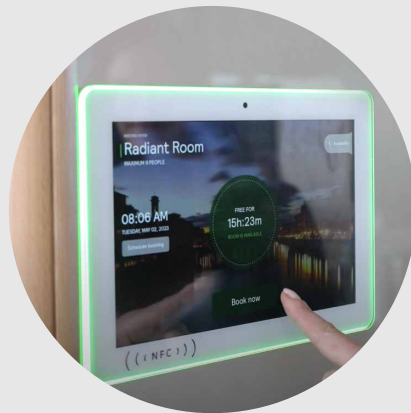

As our technology partner, Nura Space echoes Schiavello's focus on enhancing the employee experience and improving workspace optimisation and business effectiveness. Nura Space can support our clients in gaining knowledge and insights to then drive the right workplace solution decisions.

# Workstations

Arch *NX*  
Krossi *NX*

# WiFi-enabled desk height controller

Available across Krossi and Arch workstations, this new WiFi-enabled desk-height controller integrates with the Nura Space platform, allowing team members to book, check-in and select from personalised desk heights to ensure a seamless and consistent set up wherever they work.

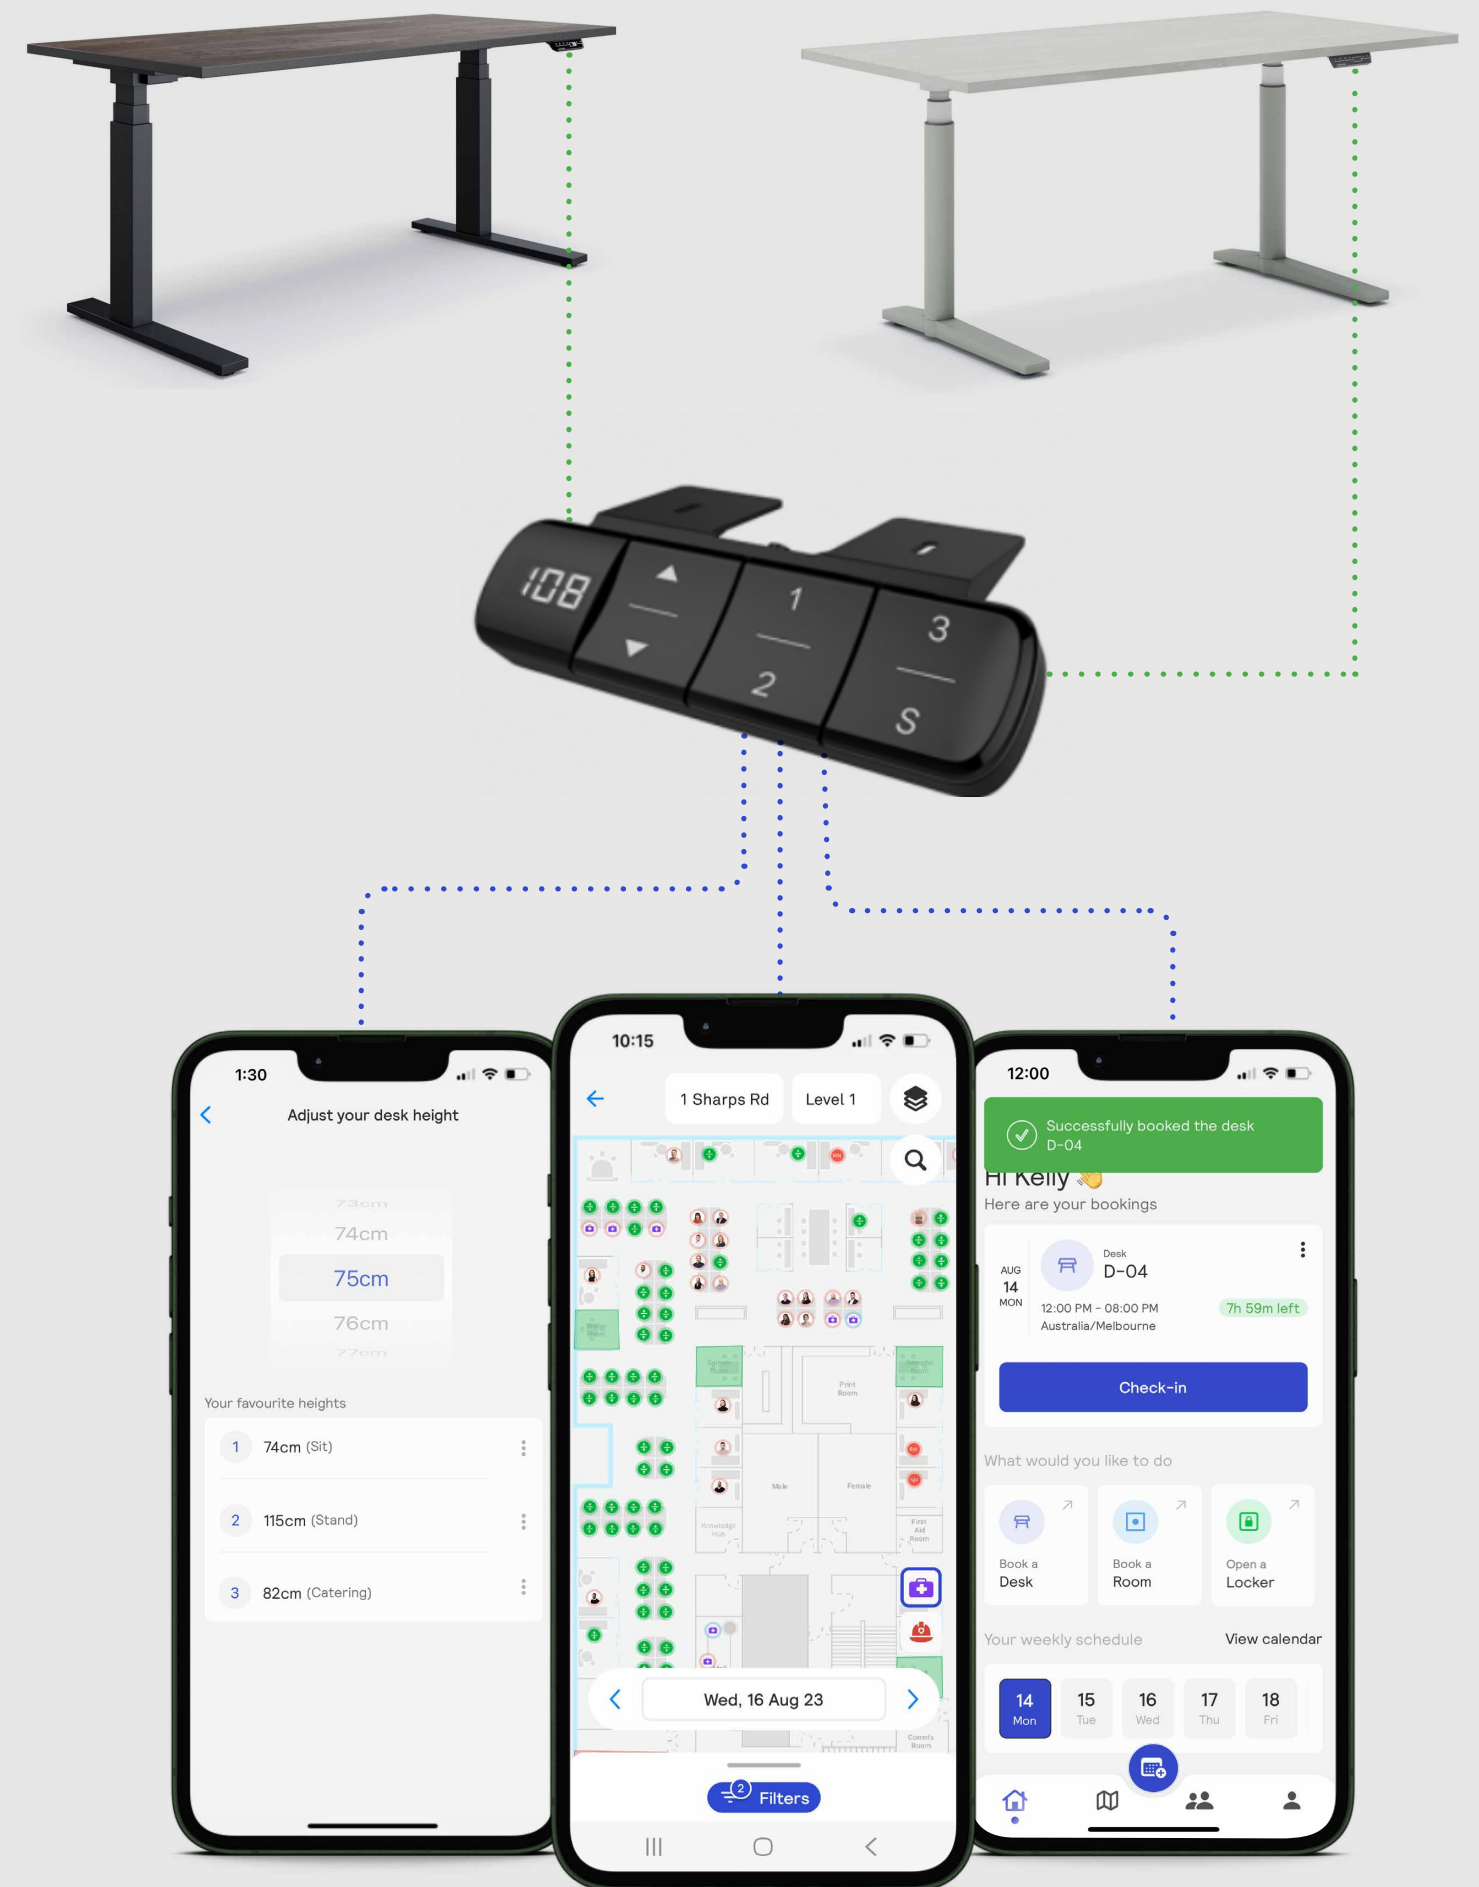

Connecting via WiFi as opposed to Bluetooth allows the desk to be online 24/7, giving end users and businesses accurate, real-time updates around the availability and status of each desk, without needing to be in range to pair a mobile device.

This layering of technology over physical workplace assets such as desks, meeting spaces and lockers allows organisations to truly understand how their office is being utilised. Nura Space's reporting dashboard provides live metrics around asset availability and usage, with organisations able to compare data over time across floors, zones and other office locations. This utilisation data can then be used to help shape the ideal workplace, informing important decisions around the number and location of physical assets within a space.

When connected to the Nura Space platform, managers can maintain a connected workforce (even during hybrid working), booking and managing personalised 'zones' for in-office workdays and even using the tool to onboard new-starters.

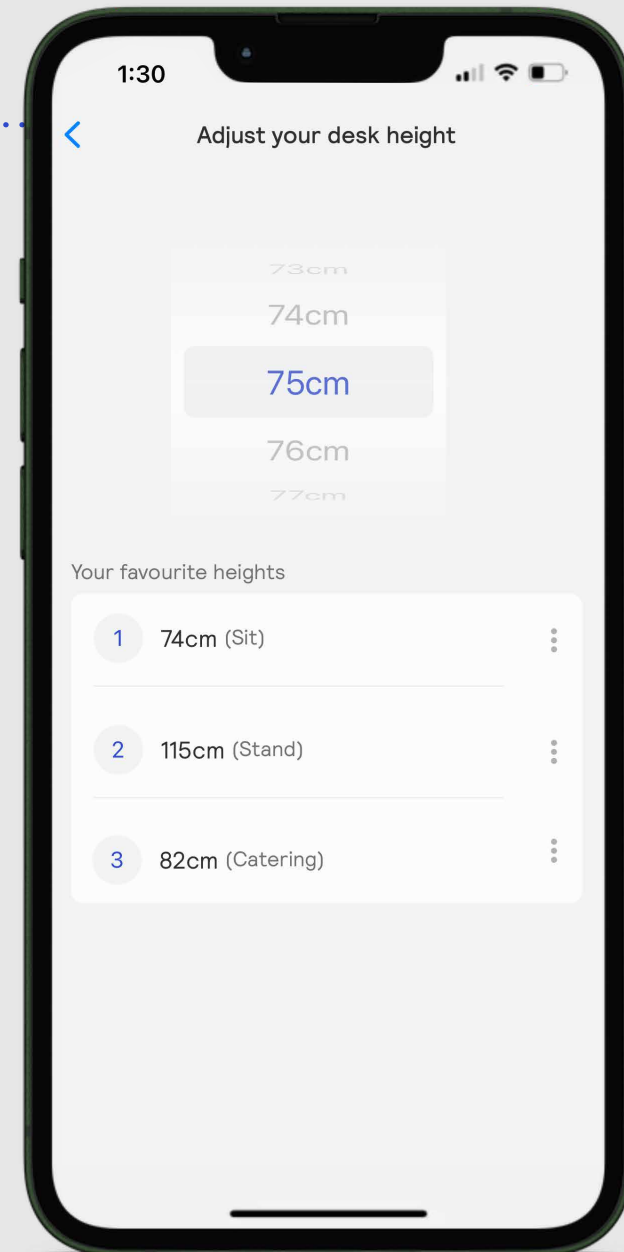

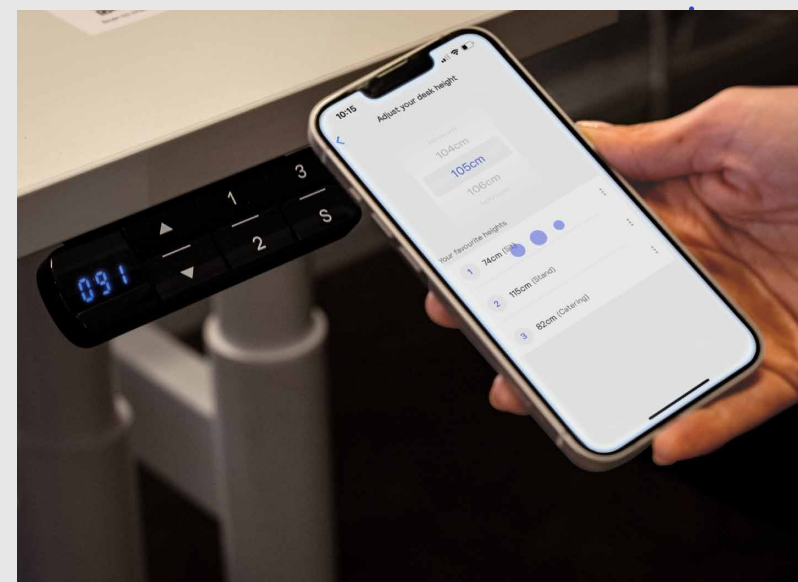

Innovative automations have the potential to maximise cleaning time and reduce facilities management costs, with the ability to reset desks to a pre-determined height at a chosen time, once no longer in use. Programming can also be used to indicate which desks have been checked into each day, assisting with maximising cleaning time, quality of work and providing the opportunity for cost reduction.

The WiFi-enabled controller is integrated into the sit-stand desk and is backed by enterprise level security. This security covers the entire product life cycle, starting from production through to end-of-life disposal. For more security information, please see Specification Sheets for Krossi **NX** or Arch **NX**.

# Follow Me Ergonomics

Upon checking into a desk, users can select from their personalised pre-set desk heights via the app or controller directly, providing a consistent ergonomic experience no matter which desk they are working from. WiFi connectivity means the desk is online 24/7, enabling users to book and set up a desk remotely. This differs to Bluetooth based solutions which only sends information when a mobile device is in range and paired with a desk.

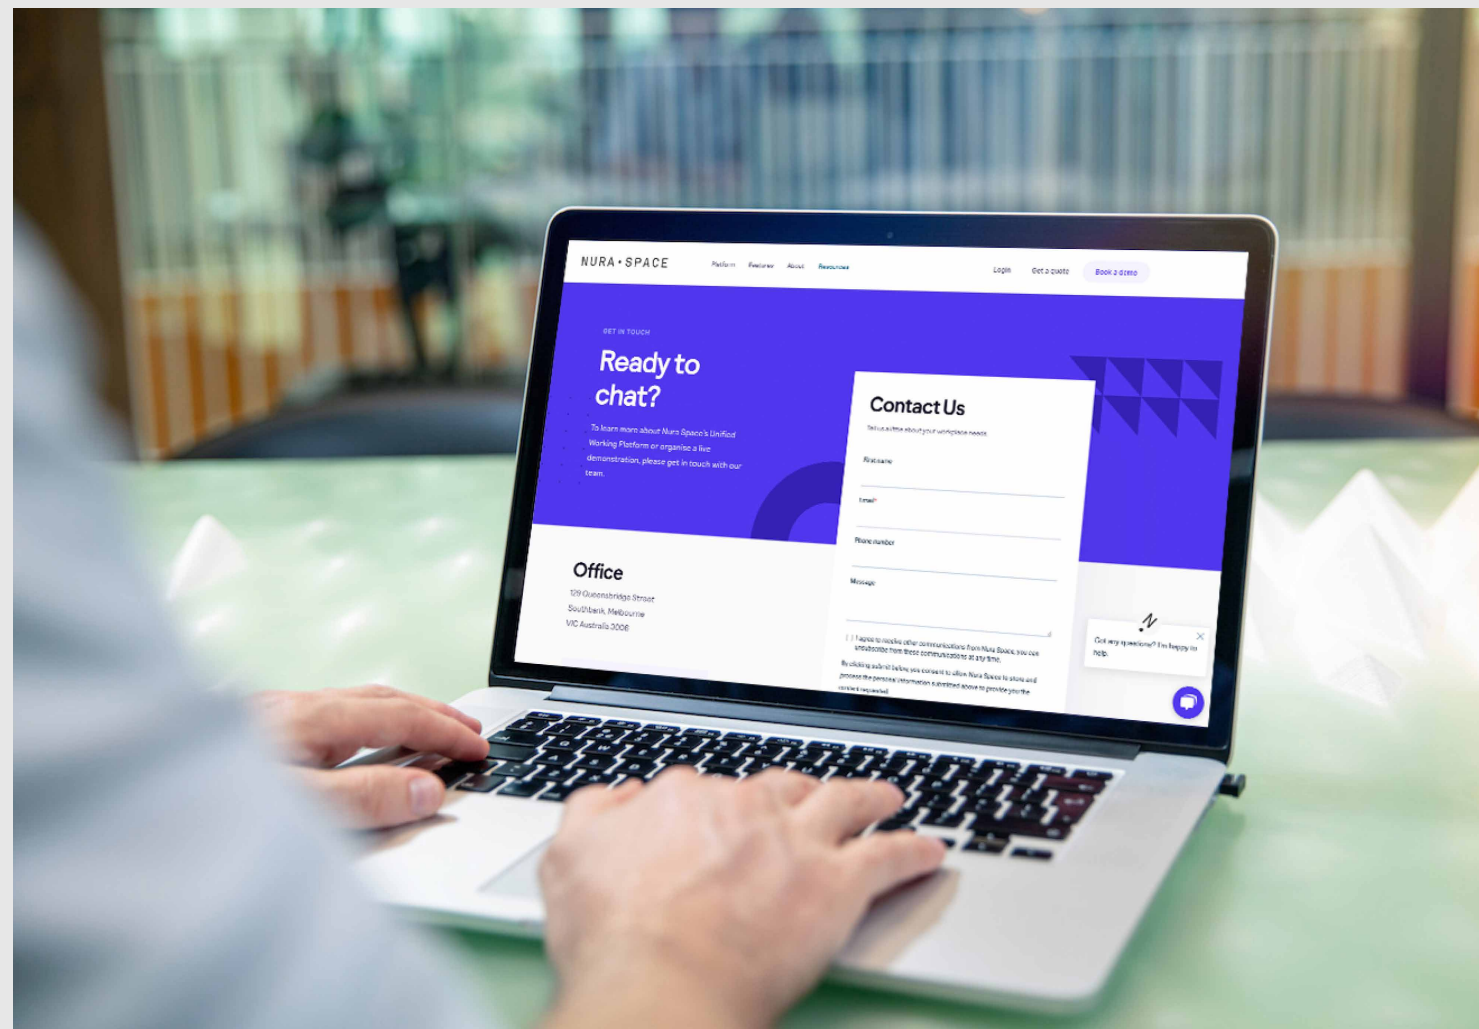

# Time and cost-saving automations

A little-known cost to implementing sit-stand desks is the 're-setting' required to return them to sitting height each evening. Usually undertaken desk-by-desk by a company's facilities staff, the new desk-height controller can reduce this cost with its innovative automations. Desks can be reset to a pre-determined height at a chosen time, once no longer in use. Programming can also be used to indicate which desks have been booked and checked into each day, assisting with maximising cleaning time, quality of work and providing the opportunity for cost reduction.

Desks D01–D88 Move reset every night	Desks D01 to D88 (Marketing Team) to be moved to 100 cm every night at 8 PM
---	--

Name	Description	Date Created	Last Updated
Level 1 desks to 100 cm every day	At 8 AM, all desks on level 1 are to be moved to 100 cm.	Fri 14 Jul 2023, 3:26 PM	Fri 14 Jul 2023, 3:26 PM
Level 7 desks to 100 cm every day	At 8 AM, all desks on level 7 are to be moved to 100 cm.	Fri 14 Jul 2023, 3:26 PM	Mon 24 Jul 2023, 3:26 PM
Move all checked-in desks at 5 PM	At 5 PM every day, all desks that have been checked-in to will move to 75 cm.	Wed 5 Jul 2023, 2:48 PM	Mon 24 Jul 2023, 2:48 PM
<b>Desks D01–D88 Move reset every night</b>	<b>Desks D01 to D88 (Marketing Team) to be moved to 100 cm every night at 8 PM</b>	Wed 5 Jul 2023, 2:48 PM	Mon 24 Jul 2023, 2:48 PM

## In-house expertise and support

As industry experts on workplace innovations, this technology was developed specifically for Schiavello Furniture, by Nura Space (technology partner within Schiavello Group). With the end user experience at the heart of everything we do, our fully integrated service offering includes access to a range of support services and no hidden fees. Our desk-height controller is backed by enterprise level security, covering the entire product life cycle from production through to end-of-life disposal.

## Access utilisation data in real time

The Nura Space platform provides a single touchpoint to monitor behaviour analytics and measure workplace and desk utilisation, with the ability to generate comparative reports for more informed decision making. This real time data is far richer due to the 24/7 connectivity of the desk.

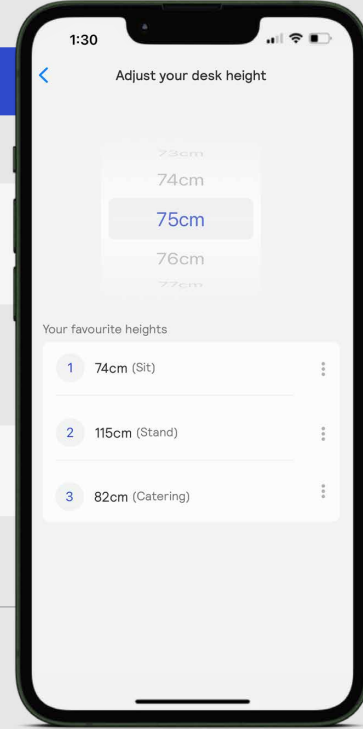

# Operational features

Currently available across leading height adjustable workstations Krossi and Arch, the desk-height controller includes the below features for end users / employees:

## Employee / End User

Operational Features	Physical Interaction	Web / Mobile Application
Reserve a desk	NA	✓
Set height preferences	✓ Acquired desk only Limited to 3 preferences	✓ Any desk Unlimited preferences
Reposition desk to height preference	✓ Acquired desk only Limited to 3 preferences	✓ Acquired desk only
Reposition desk to a particular height	NA	✓ Acquired desk only
Move desk UP / DOWN	✓ Any desk	✓ Acquired desk only

## System Administrator

Operational Features	Physical Interaction	Web Application*
Reposition desks to a particular height	NA	✓
Configure desk settings	NA	✓
Monitor desk operating conditions <sup>1</sup>	NA	✓
Turn ON/OFF RF module <sup>2</sup>	✓ Single-chosen desk With privileged access only	✓
Add/remove/modify RF related credentials <sup>3</sup>	NA	✓
OTA update	NA	✓
Factory reset devices	NA	✓
Decommission devices	NA	✓

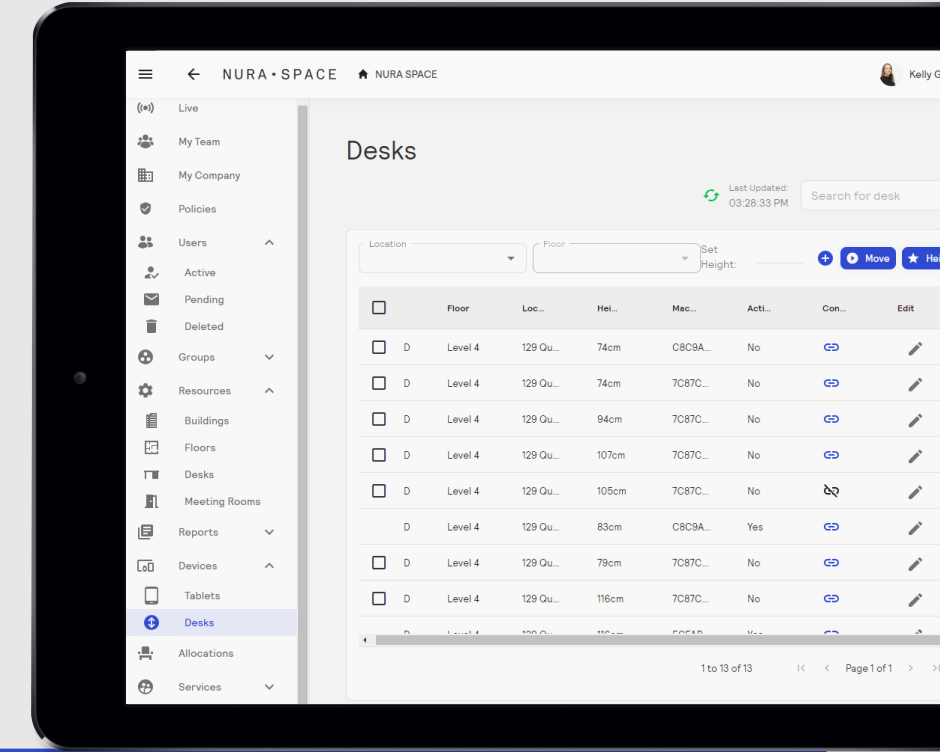

Notes:

\* Multi-chosen desk

(1) The desk operating conditions currently offered are but not limited to: *Desk height, maximum/minimum desk height, desk location, anti-collision sensitivity, power consumption, connected SSID, connected AP MAC, device MAC, wireless RSSI, HASH values for sensitivity information*

(2) The RF module might include WiFi only module, or WiFi/BLE integrated module

(3) One-way communication only, a failed operation will result in the devices having to be decommissioned and re-deployed

# Smart Lockers

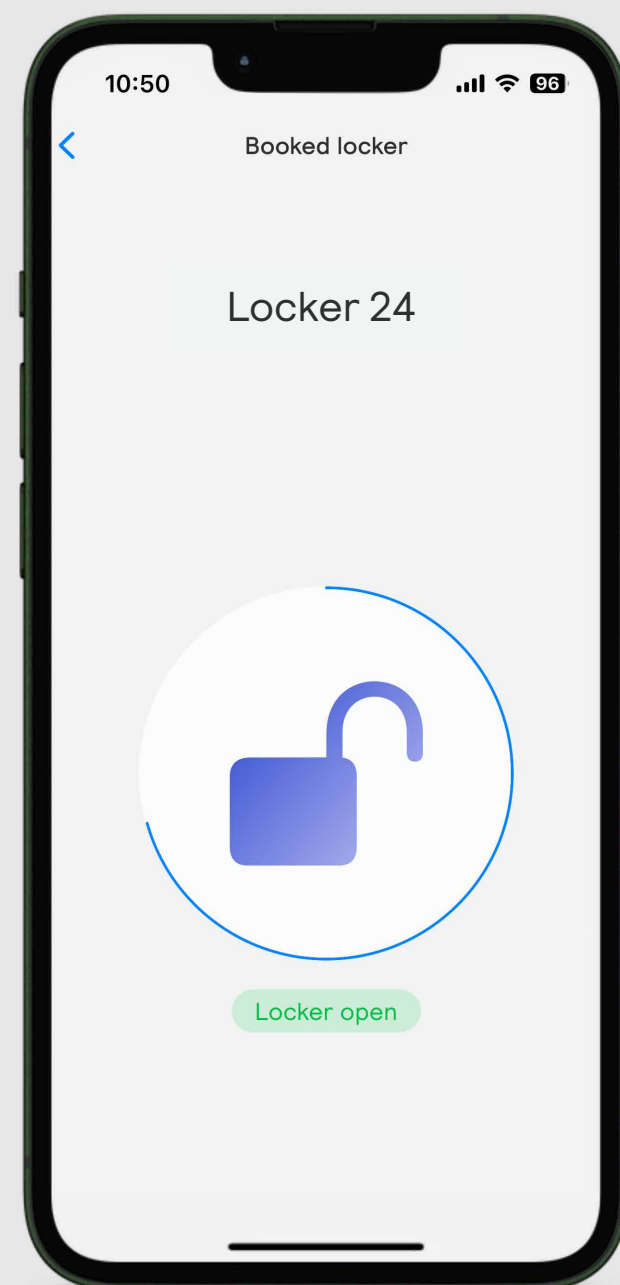

Storage *NX*

# Supporting a flexible work culture

Schiavello's Storage **NX** Locker System supports a flexible work culture through smart and adaptable self-service technology. With joinery manufactured by Schiavello and software integration with the Nura Space platform, this turn-key solution means users can remotely book, release or open a locker from their phone or desktop. Locker usage is optimised through real-time booking data and the ability to retrofit with existing storage solutions, delivering a more flexible and sustainable approach to workplace storage.

Be it activity-based working (ABW), agile or even traditional, Storage **NX** enables the evolution of the modern workplace, allowing freedom of choice and empowering users to have a place for belongings without the need for statically allocated real estate. Integrating with the Nura Space platform provides users the ability to easily book and access lockers in both local and interstate offices, while real-time booking data illustrates how lockers are being used – resulting in informed and intelligent business decisions.

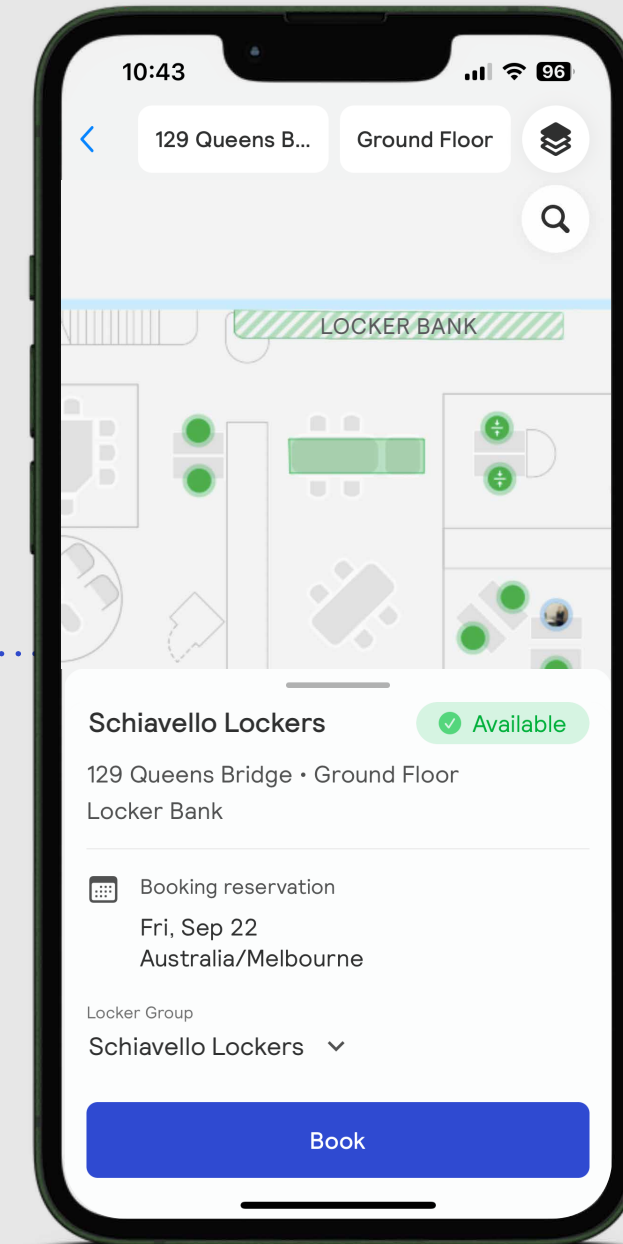

With the ability to tailor joinery sizes, retrofit to existing storage solutions and easily configure user and locker groups, companies can continue to tweak business rules to enable a move into agile/ABW, without the need for costly reformation of the base building.

# User control & security

Integrated with the Nura Space platform, users can remotely find, book, release and open lockers via the web or mobile app. The live interactive floorplan highlights locker availability status, automatically assigning the closest locker when booked alongside a desk. Users have the ability to set their locker to unlock by the time they reach it, with push-to-open doors meaning lockers will

never pop open unattended, remaining secure and opening safely. Utilising the Nura Space software streamlines the employee experience, allowing them to find and book desks, lockers and meeting rooms within the one mobile or web app. Extended booking periods and other custom features are also available.

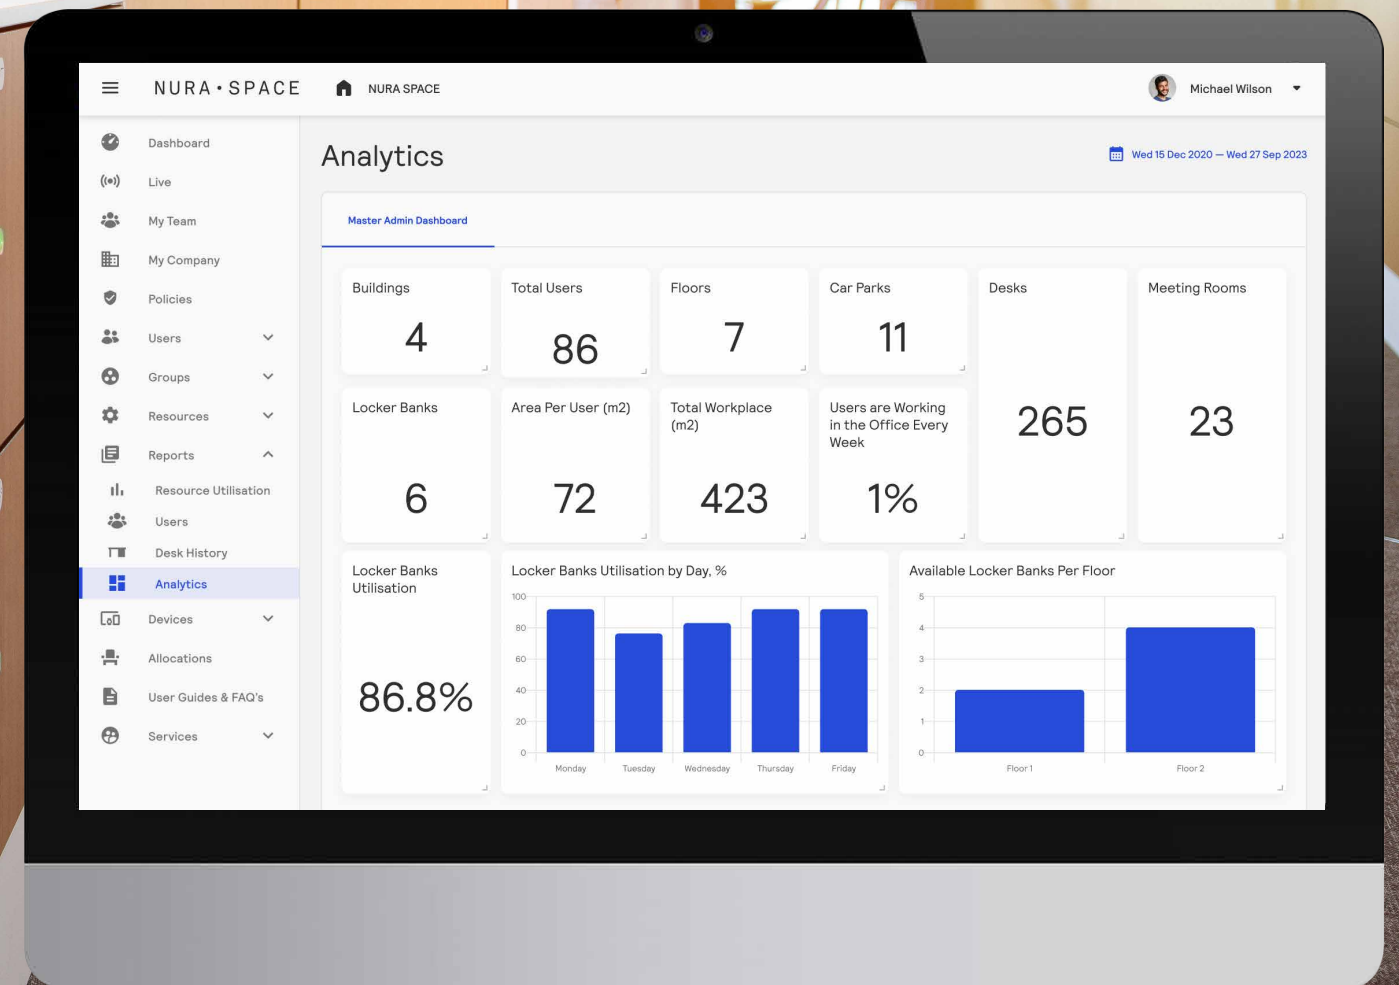

## In-house support

Schiavello are proud to be the only company in Australia that can deliver locker joinery, hardware and software as one. With the end user experience at the heart of everything we do, our fully integrated service offering includes access to a range of support services and no hidden fees. Our Software as a Service (SaaS) fees include implementation and onboarding, cloud hosting, regular software and firmware updates, as well as access to customer support.

# Workplace metrics

As industry experts on workplace innovations, this technology was developed specifically for Schiavello Furniture, by Nura Space (technology partner within Schiavello Group). With the end user experience at the heart of everything we do, our fully integrated service offering includes access to a range of support services and no hidden fees. Our desk-height controller is backed by enterprise level security, covering the entire product life cycle from production through to end-of-life disposal.

# Rooms

Focus Quiet Room ***NX***

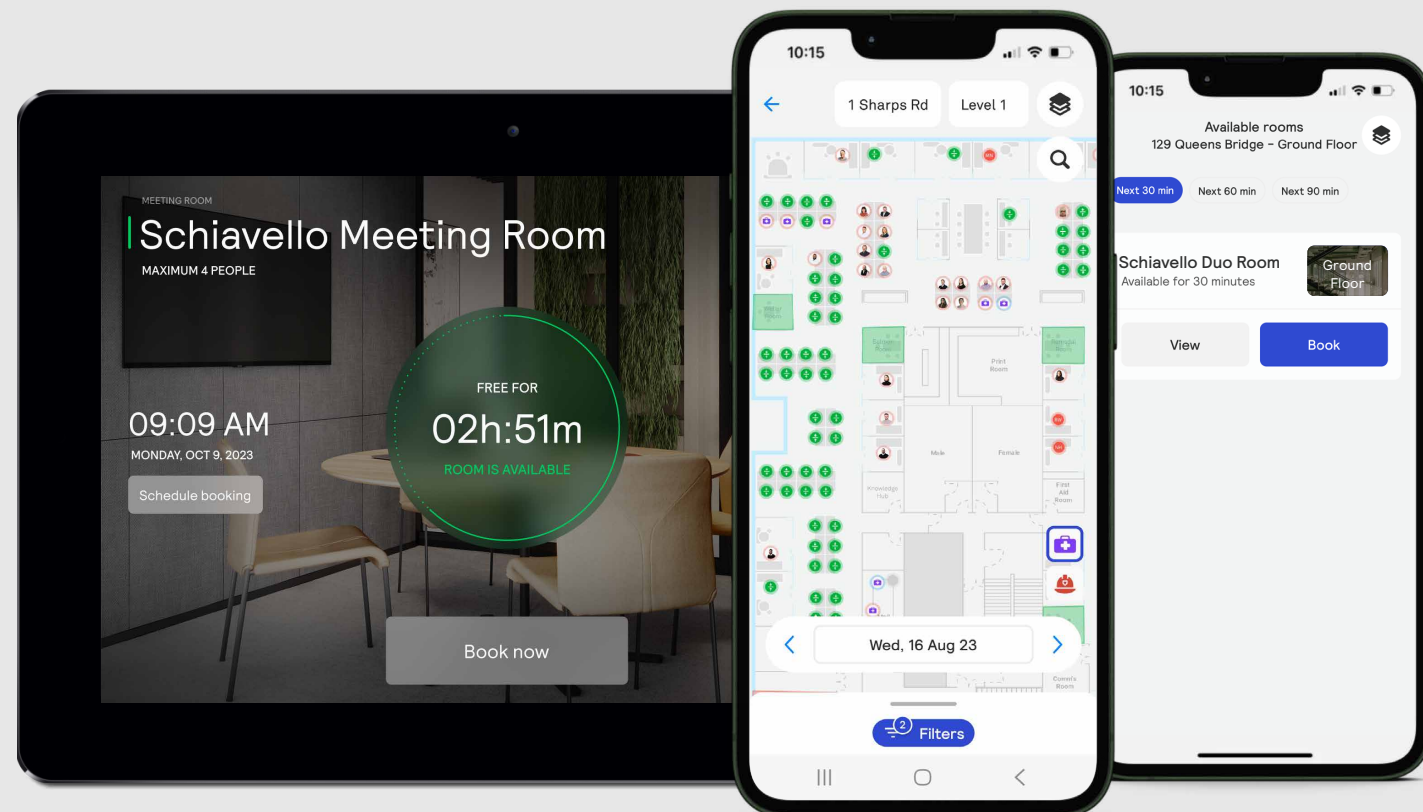

# A space for uninterrupted focus

Further enhancing the Focus Quiet Room collection, FQR **NX** offers a WiFi-enabled meeting room booking panel that is integrated with the Nura Space platform. Users can book and check-in to meetings via the panel directly, as well as view upcoming room bookings. Meeting room usage is optimised through real-time booking data, whilst the ability to retrofit with existing meeting room solutions delivers a flexible and sustainable approach to workplace spaces.

Developed in partnership with Schiavello Furniture by Nura Space (technology partner within Schiavello Group), the WiFi-enabled room booking panel is currently available across the Focus Quiet Meeting Room, Work Room and Duo Work Room.

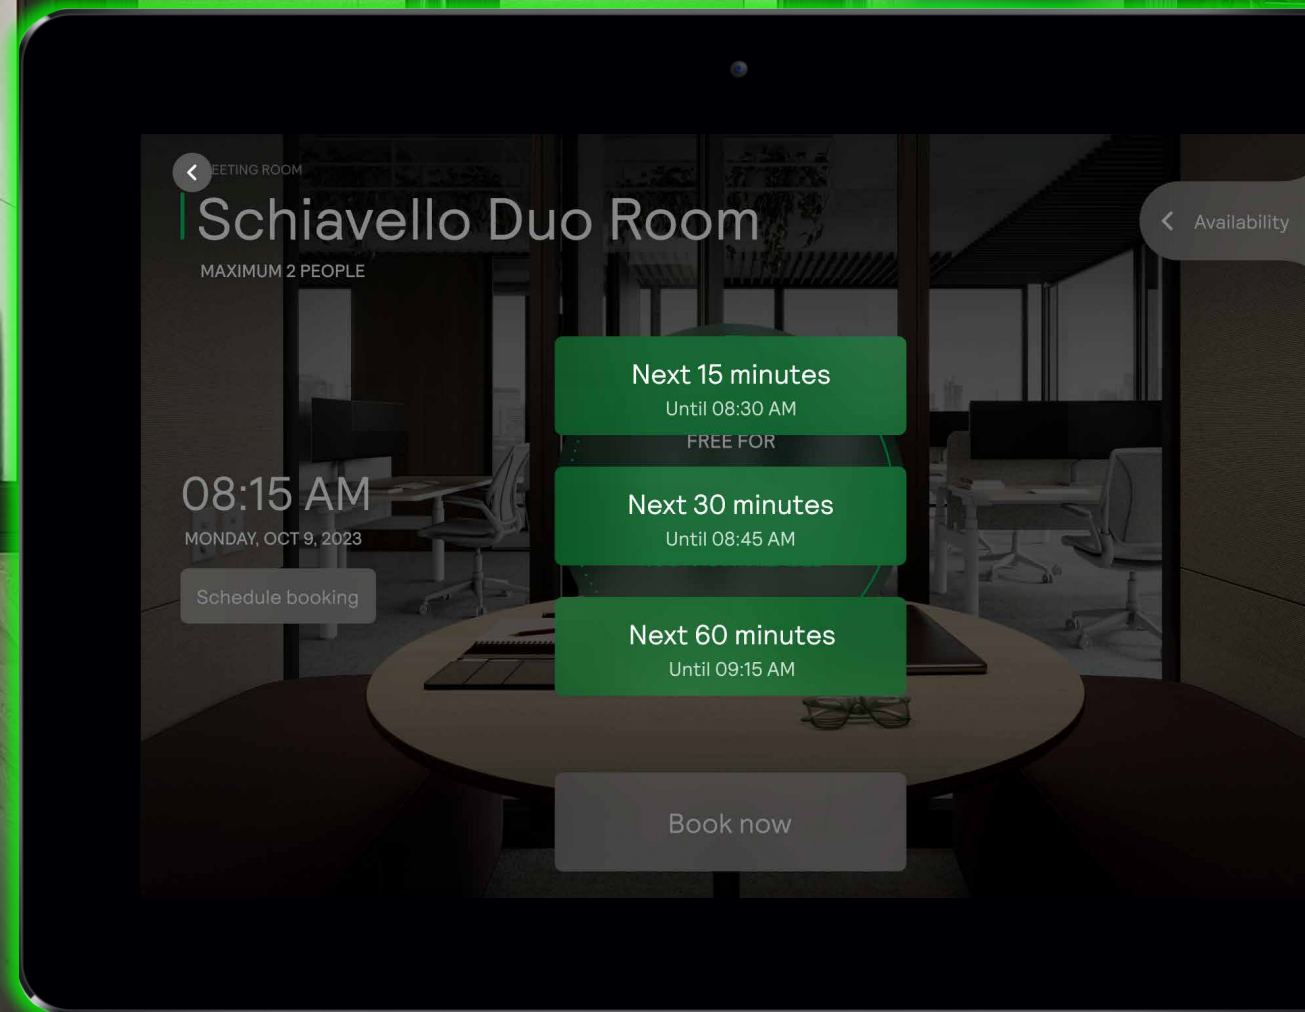

As the open plan office typology has grown in popularity over the last decade, with it also grew issues over a lack of spaces of focus within the workspace. Distracting and intrusive noise in the office can lead to poor concentration and, as a result, is a costly problem for businesses today. Meanwhile, research suggests that office workers lose over an hour per day due to uncontrolled interruptions.

The Focus Quiet Room range offers a space for uninterrupted focus and meetings thanks to its industry-leading acoustics, highly customisable finishes and modular set-up.

# Seamless integration

Synchronising with the wider tech ecosystem including the Microsoft Suite, users can remotely find, book and check-in to a meeting room space via the booking panel directly or through the Nura Space web or mobile app. The 10.1 inch touch screen includes an LED light bar to easily identify a room's availability status, whilst a customised interface allows for custom naming and background imagery. Utilising the Nura Space platform streamlines the employee experience, supporting a hybrid workplace by allowing them to find and book desks, lockers and meeting rooms within the one mobile or web app.

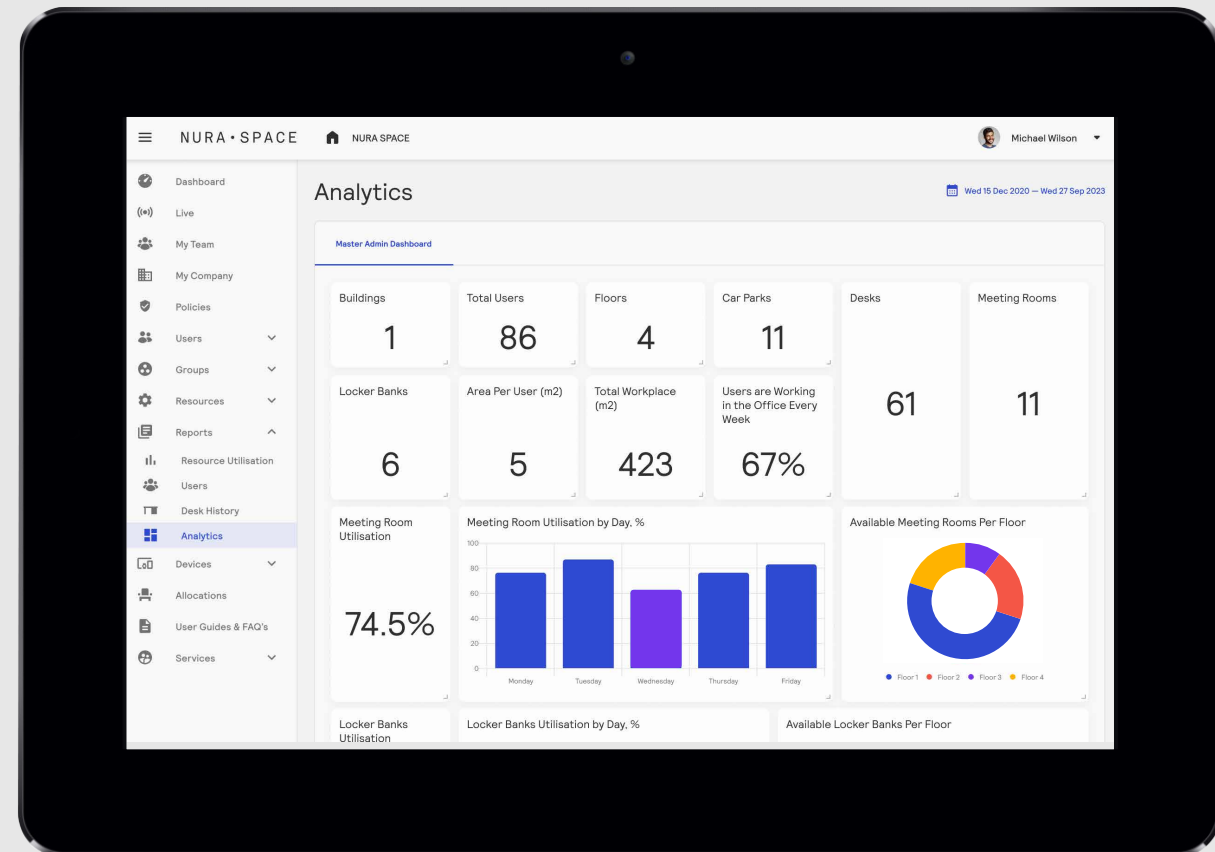

# In-house support & utilisation metrics

Schiavello are proud to be the only company in Australia that can deliver a full turn key solution, with meeting rooms, booking panel hardware and software as one. With the end user experience at the heart of everything we do, our fully integrated service offering includes access to a range of support services and no hidden fees. Our Software as a Service (SaaS) fees include implementation and onboarding, cloud hosting, regular software and firmware updates, as well as 24 hour user support.

The Nura Space platform provides a single touchpoint to monitor and measure workplace behaviours, including meeting spaces. SOC 2 Type 2 certified, Nura Space offers the ability to generate comparative reports for more informed decision making, businesses can access real-time booking data to understand how meeting spaces are being utilised, resulting in informed and intelligent business decisions.

## Ecology and sustainability

Schiavello's most important commitment to sustainability is the company-wide Environmental Management System under ISO 14001. The environmental design principles realised means we design for the environment, focusing on efficient energy use and minimum emissions, longevity and durability, re-use and recycling of our products.

Our principles of ME WE (Materials, Energy, Waste Emissions) give us a simple way to think about how our operations impact the environment.

Printed on an Australian made paper stock that is PEFC Certified and made from elemental chlorine-free bleached pulp sourced from sustainably managed forests and non-controversial sources. It is manufactured by an ISO 14001 certified mill using renewable energy sources.

## About Schiavello

Schiavello is a multi-disciplinary company dedicated to developing intelligent, inspiring, ecological and resilient solutions for the office, the home and public spaces.

Schiavello's concepts and products are developed in Australia by applying a design process that brings together the company's core design principles and engineering with the creativity of local and international designers.

The Schiavello head office and world-class manufacturing facilities are integral to our continually developing rich tapestry of knowledge. This knowledge ultimately assists us in informing the right solutions and tools for each organisation's needs and people, allowing us to consistently achieve our philosophy that 'Anything is possible'.
