Dining armchair

Lord 02
Dining armchair,
detail

Both seat pad and backrest have extra upholstery to ensure greater comfort. The backrest support is specially shaped as a handle, making it easy to move the chairs and armchairs around. The front part of the seat is rounded to make sitting even more comfortable during an extended stay. The lounge armchair and settee come in 42 cm and 46 cm seat heights; the higher one facilitates the standing up.

The seat upholstery is detached from the backrest to ensure that the seat is easy to clean. (Lord 22)

The hallmark feature of Lord seating is an ergonomic armrest offering a secure and comfortable grip thanks to the armrest being longer than the chair leg. The armrest provides a more comfortable and wider support.
