

WIRED FOR WORKPLACE WELLNESS

PICTURE: Amoeba chair by Vitra, supplied by Schiavello.

LINKEDIN ASIA PACIFIC HEADQUARTERS IN SINGAPORE IS A SUBTLE REFLECTION OF THE REGION AND AN OFFICE DEFINED BY INTERCHANGEABLE SPACES.

When LinkedIn, the biggest online professional-networking service, relocated their Asia Pacific Headquarters to prime office space in the financial district, they wanted something special; a space that would attract and retain the best talent. Their largest space in the Asian region, the two level occupancy in the MBFC building is filled with textured layers to delicately reflect Asia in a modern way. Designed by M Moser Associates, the interior features many symbolic references to Chinese opera, shop houses, peacocks and flower etchings.

Also paramount was creating multi-purpose spaces that would provide a multitude of alternative options to collaborate. Along with individual 120 degree workstations, extensive audio visual capabilities allow spaces to become interchangeable. Cafe areas can turn into lecture rooms, while reception and training rooms can combine to create a larger space for formal cocktail events.

“Schiavello ticked all the boxes. Quality, usability, price, lead times, delivery and support, all scored highly. We love the product, we liked the people and we look forward to an ongoing relationship”.

Nirmala Srinivasa, Associate Director of Design,
M Moser Associates.

The diversity of the Schiavello product range provides solutions for these various areas. Over 300 electronically height adjustable Krossi workstations and fixed height Krossi management desks were installed for their ease and usability. Humanscale's Freedom Headrest chairs are used by individuals at workstations and Liberty side chairs by visitors. Meeting rooms are filled with over 100 ergonomically designed Liberty chairs and Vitra's AC4 leather chairs create sophisticated comfort in boardrooms. Amoebe, Slow and Schiavello's 101 chairs provide playful options for flexible working areas and Vitra's Prismatic tables support break out areas. Executive Alto meeting tables are a sophisticated option for boardrooms in the front of house.
